EDUCATION

B.Tech Computer Science & Engineering

Delhi Technological University, New Delhi

2021 – 2025 | CGPA: 8.6 / 10

SKILLS

Languages: Python, JavaScript, C++, Java, SQL

Web: HTML, CSS, React.js, Node.js, Express.js

Databases: MySQL, MongoDB, PostgreSQL

Tools: Git, GitHub, VS Code, Postman, Docker

AI/ML: NumPy, Pandas, Scikit-learn, TensorFlow

PROJECTS

JobFlow — AI Job Application Tracker | Node.js, Express, Groq AI, Vanilla JS

- Built full-stack job tracker with resume analyzer using LLaMA 3.3 70B via Groq API
- Implemented PDF/DOCX parsing with pdf-parse and mammoth libraries
- Designed Kanban pipeline, analytics dashboard with custom Canvas charts

Crop Type Mapping | Python, Google Earth Engine, Scikit-learn, Sentinel-2

- Classified crop types using Random Forest on satellite imagery with 89% accuracy
- Processed multi-band Sentinel-2 data and generated NDVI, EVI indices

Urban Heat Island Analysis | Python, Landsat 8, Google Earth Engine

- Analyzed LST patterns across urban zones using Landsat 8 thermal bands
- Generated heat maps and comparative seasonal reports

EXPERIENCE

Remote Sensing Intern — India Space Academy

May 2025 – July 2025

- Worked on GEE-based land use classification and urban thermal analysis
- Delivered two complete projects with Colab notebooks and technical reports

ACHIEVEMENTS

- Solved 300+ problems on LeetCode (Data Structures & Algorithms)
- Completed IIT Madras BS Data Science qualifier preparation
- Built and deployed 3 full-stack projects independently

CERTIFICATIONS

- Google Earth Engine for Remote Sensing — ISA
- Python for Data Science — Coursera
